

## NCERT Solutions for Class 10 Maths Exercise 1.1

Solve the followings Questions.

**1. Use Euclid's division algorithm to find the HCF of:**

- (i) 135 and 225
- (ii) 196 and 38220
- (iii) 867 and 255

**Answer:**

**(i) 135 and 225**

Since  $225 > 135$ , we apply the division lemma to 225 and 135 to obtain

$$225 = 135 \times 1 + 90$$

Since remainder  $90 \neq 0$ , we apply the division lemma to 135 and 90 to obtain

$$135 = 90 \times 1 + 45$$

We consider the new divisor 90 and new remainder 45, and apply the division lemma to obtain

$$90 = 2 \times 45 + 0$$

Since the remainder is zero, the process stops.

Since the divisor at this stage is 45,

Therefore, the HCF of 135 and 225 is 45.

$$\begin{array}{r} 135 \overline{) 225} \quad (1 \\ \underline{-135} \\ 90 \\ \hline 90 \overline{) 135} \quad (1 \\ \underline{-90} \\ 45 \\ \hline 45 \overline{) 90} \quad (2 \\ \underline{-45} \\ 45 \\ \underline{-45} \\ 0 \end{array}$$

**(ii) 196 and 38220**

Since  $38220 > 196$ , we apply the division lemma to 38220 and 196 to obtain

$$38220 = 196 \times 195 + 0$$

Since the remainder is zero, the process stops.

Since the divisor at this stage is 196,

Therefore, HCF of 196 and 38220 is 196.

$$\begin{array}{r} 196 \overline{) 38220} \quad (195 \\ \underline{-196} \\ 1862 \\ \underline{-1764} \\ 980 \\ \underline{-980} \\ 0 \end{array}$$
$$\begin{array}{r} 255 \overline{) 867} \quad (3 \\ \underline{-765} \\ 102 \end{array}$$
$$\begin{array}{r} 102 \overline{) 255} \quad (2 \\ \underline{-204} \\ 51 \end{array}$$
$$\begin{array}{r} 51 \overline{) 102} \quad (2 \\ \underline{-102} \\ 0 \end{array}$$

(iii) 867 and 255

Since  $867 > 255$ , we apply the division lemma to 867 and 255 to obtain

$$867 = 255 \times 3 + 102$$

Since remainder  $102 \neq 0$ , we apply the division lemma to 255 and 102 to obtain

$$255 = 102 \times 2 + 51$$

We consider the new divisor 102 and new remainder 51, and apply the division lemma to obtain

$$102 = 51 \times 2 + 0$$

Since the remainder is zero, the process stops.

Since the divisor at this stage is 51, Therefore, HCF of 867 and 255 is 51.
